SUMMARY

QA Analyst with 4 years of remote experience testing web applications across the full SDLC and STLC, in education technology and B2B/B2C e-commerce. Skilled in manual, functional, regression, exploratory, acceptance (UAT) and API testing with Postman, defect tracking in Jira, and working in Agile/Scrum and BDD teams. Test automation with Playwright and Cypress; bilingual in English and Portuguese.

WORK EXPERIENCE

Software Quality Assurance Analyst | Motrix Techknowledge | Remote **Sep 2022 – Present**

Education technology company building curriculum and educational systems for schools

- Wrote and maintained 200+ documented test cases for an educational platform used to create and deliver school curriculum, covering functional, regression and acceptance (UAT) scenarios.
- Validated curriculum content and teaching materials, including student workbooks, delivered through APIs, using Postman to check data accuracy, structure and completeness before release.
- Performed manual and exploratory testing on critical features and reported defects with clear reproduction steps, screenshots and browser DevTools findings, so developers could fix issues quickly.
- Validated features against acceptance criteria using Behavior-Driven Development (BDD) with developers and product team members, improving UAT pass rates.
- Maintained and repaired Cypress automated tests to keep regression checks reliable.

Software Quality Assurance Intern | Flexy E-commerce Platform **May 2022 – Sep 2022**

B2B and B2C e-commerce platform

- Performed functional and exploratory testing on a B2B and B2C e-commerce platform, identifying 10+ high-impact issues before release.
- Built and ran API tests in Postman for core e-commerce flows, including product creation, user login and account creation.
- Created test plans and detailed test reports, and ran Cypress automated tests as part of regression, supporting clean, stable releases.

ADDITIONAL EXPERIENCE

Assistant Manager & Sales Associate | Trudon | Aventura Mall, FL

- Top-selling associate and assistant manager; resolved customer issues and tracked inventory in Excel.

PROJECTS

QA Cart | React, TypeScript, Vite, Jira, GitHub, Vercel | github.com/JohanJoestar333/qa-project | Video: how I test (Loom)

- Built a demo online store (login, catalog, cart, checkout, order confirmation) as a realistic system under test and ran it like a real company: Jira tickets, a feature branch and pull request per ticket, and separate staging and production environments.
- Ran smoke and functional checks on every Vercel preview and staging deployment before release, and documented test data, pricing rules and testable areas (login validation, access control, stock limits, price math).

QA Test Case Workbook | Manual testing, Excel, Google Sheets | View workbook

- Reusable workbook of 45 manual test cases for the Luma demo e-commerce store, with a structured template.

QA Portfolio Website | React, Vite, Vercel | portfolio-thomas-pessoa.vercel.app

- Interactive portfolio with my testing toolkit, test scenarios, certificates and an interactive QA Lab.

EDUCATION

Associate Degree, Systems Analysis and Development | UNISUL | GPA 3.8 **Jan 2024**

SKILLS

Testing: Manual, functional, regression, exploratory, smoke, acceptance (UAT) and API testing; test case design; test plans and reports; defect tracking; BDD; SDLC/STLC

Automation: Playwright, Cypress

Tools: Jira, Postman, ClickUp, GitHub, Vercel, browser DevTools, Slack, Excel, Adobe Photoshop (certified)

Technical: SQL (MySQL, PostgreSQL), HTML, CSS, JavaScript, TypeScript, React

Methodologies: Agile, Scrum, Kanban **Languages:** English (fluent), Portuguese (fluent)

CERTIFICATIONS

ISTQB Certified Tester Foundation Level (CTFL), in progress • Adobe Photoshop Certification • Database Modeling: MySQL & PostgreSQL (2022) • PRONATEC Mobile Devices Programmer (2021) • Claude 101, Claude Academy (2026) • Introducing AI, Raspberry Pi Foundation (2026) • Craft Precise Prompts for AI Models, IBM • Introduction to Playwright, Test Automation University
